

Cats Purr to Heal

Hillsborough, NC -- Recent studies are revealing how purring may be the secret to cats' nine lives. CHI Institute is the first in the U.S. to release studies that conclusively corroborate the healing results from infrasonic sound waves. Scientists at the Fauna Communications Research Institute in North Carolina have determined that the frequency at which many cats purr, between 27 and 44 hertz for house cats, matches the frequency that seems to help human bones strengthen and grow. Cats purr, not only when they are happy, but also when injured. They heal quickly from bone and tissue injuries caused by the impact of falling great distances.

In addition to the scientific studies CHI has published, thousands of medical doctors have already observed first-hand the results of therapeutic infrasound. Merle Janet M.D. states, "I am using the machine in daily practice. I tried it on my cat and she immediately flopped down, curled up and half-closed her eyes and purred away. Must've seemed to her like her momma cat had come back."

96% of Infrasonic users report satisfactory to excellent benefits from infrasound therapy for pain, inflammation, improving circulation and accelerating the healing process. 35% of CHI Institute's customers report near-miraculous results in improving their acute and chronic ailments.

eBay Motors vehicle listing:

Get the unique feeling of this extraordinary Italian made touring motorcycle. Fuel injected with 74 horse power, this Moto Guzzi has a manual transmission with 5 speeds. This bike is in excellent condition with little or no wear and tear or damage. Original owner, has kept this motorcycle garaged, and has not been riding it in the past few years. The fuel injection was recently revamped, and the bike is ready to roll! Expertly maintained, quick starting, smooth running and extremely reliable, every component works as great as it looks.

With lots of chrome and a beautiful classic design, this bike has a dazzling appearance. With some special features such as linked integrated braking, steering damper and Weber fuel injection, this Guzzi is easy to get attached to. Big, comfortable single seat, modified sacrificing passenger seat to better fit a single tall rider. It features Bitubo forks, Brembo calipers, dual 300mm front brake rotors, and spoked wheels. A classic instrument cluster housing only a speedometer and tachometer greets you, along with the standard assortment of status lights.

A linked braking system operates the left front caliper and rear brake when the lever is pulled, while the brake pedal operates the rear caliper and right front brake. Weber fuel injection and an adjustable steering damper for cornering stability and just the right amount of tightness in the steering.

The engine starts easily and is easy to ride with the easy pull of the accelerator twist grip. The Weber fuel injection system helps Guzzi's 2-valve 1064cc V-twin engine pull cleanly from as low as 1500 rpm all the way to the 8000 rpm redline with no rough spots. Peak power can be found at a lazy 6400 rpm where the Guzzi puts out a respectable 75 hp.

Requires less frequent shifting because the legendary mile-wide power spread allows you forget about shifting in city traffic as you sit back and let the torque pull you along. Once you get out of the city and find the tranquility of the open road you'll discover that the California is in its element. Vibration from the engine is ever-present although more subtle than a Harley - it isn't enough to be annoying, but you won't ever forget that you're riding a V-twin.

Handling manners are respectable considering the bike's intended purpose and the suspension soaks up bumps quite well. Very comfortable cruising at medium high speeds. Guzzi's integrated braking system works quite well, and is helpful to novice riders in everyday and emergency stopping situations.

Spend some time with this motorcycle, and the satisfying torque, easy maintenance and undeniable personality will win you over. If you want something a little different, ride a Moto Guzzi California; you will never forget it.

City Hall connects to Police Department with Maxtech Wireless LAN.

Anderson, CA (January 29, 1999) -- Serving a small town of 9,000 residents, the Anderson Police Department works closely with the administrators in the city hall building. With limited funds, the two buildings needed to share resources in order to maximize productivity and efficiency. The two buildings stand nearly a half-mile apart. With increased need for city workers to share files between buildings, they found that they were spending too much time waiting for dial-up modems to send data over old-fashioned phone lines.

City Finance Director Dana Shigley concluded that this expensive use of resources could be remedied by tying the two NT servers into one network. The only question was how to connect the two distant buildings in a way that the small city could afford. Guy Lemke of the local Com-pair Corporation was called in to shed light on the new technology of wireless LAN. Lemke explained how a Maxtech wireless LAN system could transmit data rapidly, easily and inexpensively between the two distant buildings.

It took less than one day for Com-Pair to install the Maxtech LANescape system between city hall and the police department. The entire wireless LAN system cost the city less than \$3,000. The workers in the two buildings can now transfer files, send email, share the Internet and output big print jobs with the speed and efficiency of a local area network. Dana Shigley was elated over the fact that the LANescape system would pay for itself many times over compared to the cost of leasing a T1 line from Pacific Bell. "The wireless LANescape system from Maxtech was quick and easy to install," states Shigley. "The LANescape installation provided a dramatic costs savings over T1 line options and provided quicker and better service."

Infrasound Proves Effective Therapy in Sports Medicine.

San Clemente, CA (April 18, 2001) - New research provides compelling evidence that infrasound therapy accelerates recovery of damaged muscles in athletes. Athletes are always seeking a competitive edge, so any therapy that can speed healing or increase performance is a much sought-after tool. Dr Ronald Riegel recently measured overwhelming effectiveness in two separate controlled studies released in April. The effectiveness of infrasound was proven when each of the 22 subjects showed improvement, while most in the control group showed further deterioration.

Athletes are always seeking a competitive edge in the top echelons of competition, such as the Olympics, the difference between championship and defeat is often measured in milliseconds. Broken bones, torn ligaments, sprained ankles and pulled muscles are obstacles that aggressive athletes must face, so quick recovery from injuries often makes the crucial difference for competitors.

Dr. Ronald J. Riegel, DVM and certified human neurophysiologist, has been involved in the athletic industry for over four decades as an athlete, coach, doctor and researcher. When Dr. Riegel used the Infratonic QGM, a therapeutic infrasound device from CHI Institute, on 12 humans and 10 racehorses, he observed a substantial athletic improvement in human and equine athletes.

Dr. Riegel then decided to put the infrasound device to the test using serological and thermograph analysis before and after infrasound treatments on injured athletes. The results were overwhelmingly positive. Blood chemistry analysis of CPK and AST showed improvement in muscle-specific diagnostic enzymes, revealing that infrasound strengthened the cell walls. Thermograms also showed decreases in joint inflammation in all subjects, with no negative side effects. Dr. Riegel states, "The most significant finding of all was that the human athletes played better and all horses in the treatment group were pacing faster, with an average decrease of 1.65 seconds."

When searching for the mechanism responsible for healing effectiveness of infrasound, researchers are somewhat puzzled. While the complete answer may await us in the future, we can review what we have learned to date. In 1978, scientists found that certain wavelengths of low frequency sound waves induced beneficial changes in measured

EEG. Biochemical structures convert sound waves to electrical signals. Bands of EEG activity provide varying functionality, such as Delta relating to sleep, Alpha to clarity, and Beta to cognitive problem solving. Doctor Riegel's research shows us that when infrasound induces alpha locally into traumatized tissue, healing is accelerated. Inflammation, edema and injured muscle cells quickly return to normal, leading to accelerated recovery and optimal athletic performance.

eBay Book Advertisement:

Become a top eBay seller in minutes! This is the shortest, most concise guide for anyone who wants to be an eBay Trading Assistant, or who just wants to sell their own items for top dollar. It includes the 15-page manual that I use to teach the people who work with me. It focuses on how to write the perfect listing that will generate the highest possible sale. You will learn how to sell an item on eBay for more than anyone else! Few eBay sellers have all of this inside knowledge on eBay and ecommerce. It answers all of the questions that you have when you create a listing on eBay, including: auction type, category, title, description, starting price, buy it now price, duration, schedule, pictures, promotion upgrades, payment, shipping, and terms. This short book also mentions other important aspects of the Trading Assistant business, such as how to find customers, and how to run a business profitably. It includes a 48-minute audio book on CD with 23 instantly accessible CD audio tracks on the above topics. It even includes several tools that you can't find anywhere else, such as an Access database, an easy form to fill out on your computer that helps you quickly and accurately put all of the necessary information for your eBay listing. It also includes an agreement that you can use to get consignment items for you to sell as a Trading Assistant. Winning bidder will get the Adobe .pdf ebook by email within 24 hours or payment, plus the paper manual and audio CD in the mail.
